

North American Bear-Resistant Products Testing Program

Official Test Results

Test File # 19-12

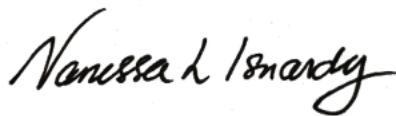

Testing Date: August 15, 2019

Product Supplier: Molok North America

We are pleased to inform you that on August 15th 2019, your MFish unit passed the captive bear test for bear-resistant products at the BC Wildlife Park in Kamloops, British Columbia. During the duration of this test your bin was not breached and therefore withstood the forces exerted by 60 minutes of black bear contact time. The MFish Unit is therefore certified black bear resistant.

If there are any questions you may have regarding the testing please do not hesitate to contact us.

Thank you for participating,

**Vanessa Isnardy,
Provincial Coordinator,
WildSafeBC**

**Tracy Reynolds
Animal Care Supervisor,
BC Wildlife Park**

**Glenn Grant,
General Manager,
BC Wildlife Park**
